

# TURNKEY EF&I

## Overview

By gaining an in-depth understanding of your goals and objectives we can successfully deliver a high quality end-to-end project that meets the needs of your business.

Our industry expertise, proven methodologies and experience enable us to provide best in class design, planning, implementation and maintenance services. This provides you with the flexibility to outsource certain components of your operations while still maintaining complete control. We can take on as much or as little as you require.

Some of the key benefits include

- Accelerated completion of projects
- Minimize risk of time and budget overruns
- Reduce staffing ramp up/down

## Services

WaveStar provides extensive, quality-driven EF&I services for projects of all sizes. We utilize our extensive network deployment experience, industry best practices and innovative engineering insights. Accelerate the time to market of your network investment, whether you are upgrading, expanding, or building a new network.

From planning through to implementation and post installation maintenance, our services can help you meet your objectives. Services include assessments, project management, engineering, material provisioning, end to end installation and a variety of maintenance options. Choose the components that best fit your needs or select our full turnkey solution.

## Engineering

- Initial consultation, needs and readiness assessment
- Network architecture and design
- Development of all specifications and engineering plans
